

Hazem Bellili

ICT student at SUP'COM

ABOUT ME

Motivated engineering student at SUP'COM with a strong interest in software engineering and cloud technologies. Passionate about problem-solving and building efficient systems, I am currently developing my skills in Python, networking, and DevOps practices.

EDUCATION

Engineering Degree in
Telecommunications
Engineering

SUP'COM

Preparatory Cycle in Physics
and Chemistry (PC)

IPEIN

HARD SKILLS

- **Programming:** Python
- **Web Basics:** HTML, CSS, JavaScript (basic knowledge)
- **Networking:** TCP/IP, Routing, Switching, OSPF (basics)
- **Operating Systems:** Linux (Ubuntu), Windows
- **DevOps & Tools:** Docker, Git, GitHub, Jenkins, Terraform, Kubernetes

SOFT SKILLS

- Problem-solving mindset
- Fast learner
- Teamwork and collaboration
- Strong analytical thinking

EXPERIENCE

Agri-Project (Full-Stack Web Application)

- Developed a full-stack web platform to connect farmers directly with customers, creating a digital marketplace for fresh produce.
- Engineered the backend to manage product listings, user accounts, and orders, and built an intuitive frontend for a seamless user experience.

WassaliApp (Mobile Application)

- Created a complete mobile application designed to [par exemple: "facilitate local deliveries" ou "connect passengers with drivers"].
- Managed the entire development lifecycle, from UI/UX design to backend integration and final deployment, focusing on performance and reliability.

Microservices Architecture Design

- Designed and implemented a microservices-based application with frontend, backend, and database services running in separate Docker containers
- Used Docker to build, run, and manage containers for each service, ensuring isolation and portability
- Implemented Minikube + Kubernetes to orchestrate the microservices locally, simulating a real cloud environment
- Configured Jenkins pipelines to automate building, testing, and deploying the containers
