📄 PROFILE

Computer Engineering student passionate about web and mobile development, cybersecurity, and artificial intelligence. Experienced in building applications with React, Next.js, and Flutter, designing the official Hackfest website, and delivering cybersecurity workshops for beginners. Led innovative AI projects, including a facial-recognition-based movie recommendation system. Ranked 63rd out of 1,800 candidates in the national Mathematics-Physics preparatory competition. Recognized for strong analytical skills, initiative, and a solution-oriented mindset.

📁 MY PROJECTS

Movie Recommendation System

Un système de recommandation de films basé sur le machine learning, développé avec **Jupyter Notebook**, pour suggérer des films selon les préférences des utilisateurs et selon le mood de l'utilisateur à chaque instant.

📄 CERTIFICATES

- CERTIFICATE OF PARTICIPATION IN AI ODYSSEY HACKATHON ORGANIZED BY GDG ON CAMPUS ISAMM X SUP'COM
- CERTIFICATE OF PARTICIPATION IN Code Crafters Contest held on February 2 , 2025 at Sup'Com
- Certificate of Recognition – RamathonX Ambassador
- Certificate of technical workshop on CyberSecurity in ISTMT

🧠 SKILLS

Web Development

- HTML, CSS, JavaScript
- React.js, Jekyll , Next.js
- GitHub Pages (ex: Hackfest website contributor)
- Responsive UI design (Figma)

Mobile Development

- Flutter & Dart
- Firebase integration
- UI/UX animations and mobile app architecture

Cybersecurity

- Network fundamentals: TCP/IP, HTTP/HTTPS
- Ethical hacking basics (as club chair)
- Awareness workshops & events (CyberSecurity Club at Sup'Com)

Artificial Intelligence

- Machine Learning with Python
- Projects in Jupyter Notebook (Movie Recommendation, Car Price Prediction)
- Data preprocessing, model training, prediction pipelines

Tools & Platforms

- Git & GitHub
- Visual Studio Code
- Jupyter Notebook & Google Colab
- Canva, Figma, Notion

🌐 LANGUAGES

French

English

Spanish

Arabic

Car Prices Prediction

Modèle prédictif en **Python** (Jupyter) pour estimer les prix des voitures chaque année, utilisant des techniques de régression supervisée.

IslaamPrayersApp

Application mobile simple pour suivre les prières islamiques quotidiennes. Permet aux utilisateurs de marquer chaque prière comme accomplie, avec une interface conviviale. (Flutter & Dart)

hackfesttn.github.io

Site web officiel du **Hackfest**, développé en **HTML/CSS basée sur le framework Jekyll**, hébergé sur GitHub Pages. Met en valeur les informations sur l'événement, les sponsors et les projets.

file_handling (C++)

Projet en **C++** axé sur la manipulation de fichiers (lecture, écriture, modification) — utile pour renforcer la compréhension de la gestion de fichiers bas niveau.

PROFESSIONAL EXPERIENCE

Web Developer

Developing the official siteweb of the Hackfest 9th Edition with Jekyll
(<https://hackfest.tn/> )

ChaiMan

SupCom CyberSecurity Club
01/09/2025 – 30/06/2026
Ariana , El Ghazela

Delivered technical workshops on Artificial Intelligence, Cybersecurity, and N8N automation, introducing participants to core concepts, practical tools, and real-world applications through hands-on learning sessions.

COURSES

Natural Language Processing

DataCamp

Natural Language Processing (NLP) is a subfield of artificial intelligence that enables machines to understand, interpret, generate, and respond to human language. It combines **linguistics**, **computer science**, and **machine learning** to process text or speech data. NLP powers applications such as **chatbots**, **language translation**, **sentiment analysis**, **speech recognition**, and **text summarization**. Common tools and libraries include **NLTK**, **spaCy**, **Transformers (BERT, GPT)**, and **TextBlob**.
